3. Click on the box titled: Show Lightroom Presets Folder
4. Double click on Lightroom
5. Double click on Develop Presets
6. Copy the folder(s) of your presets into Develop Presets folder
7. Restart Lightroom

## TIPS AND TRICKS

To achieve high quality output, please try to use High Resolution images.

If you use low resolution images, you will get low quality results.

Note that, different photos has different light, exposure, color & texture.

Every photo is not suitable for every preset > Try to use different photos to find out which one is perfect.

## BASIC TROUBLESHOOTING

REBOOT > If you're having odd problems with any computer program, the age-old wisdom "turn it off and turn it on again" still works wonders. First, try restarting the program, and if that doesn't solve it, reboot the computer.

OPTIMIZE CATALOG > Go to File menu > Optimize Catalog and wait for it to tell you it's completed before moving on.

RESET PREFERENCES > On Lightroom CC / Lightroom 6, there's a simple automated way of doing it—just hold down Alt and Shift (Windows) / Opt and Shift (Mac) while opening Lightroom and it'll ask whether to reset the preferences. The timing is crucial—hold them down while clicking/double-clicking on the app/shortcut.
